What is Zen Planner?

Zen Planner is the member management software we use at our business. Zen Planner allows you to see your full profile, sign important documents, update payment information and much more.

How to Setup Your Account

When you purchase a membership, you should get an email or ask a staff member to send your password. Your username will be your email address.

Important! You must get the login information from our front desk assistant or academy owner. You cannot login through Zen Planner's website. Signing up for a demo or free trial will not give you access to your account.

Manage Your Account

Click the "Z" in the top left corner to setup your profile. Here's what you'll need to add before coming to your first class:

- Click on the avatar to add your best selfie
- Click "Edit" in the top right corner to add your contact information
- Update your billing information
- Check your alerts to sign important waivers
